

HISTORY

X Cross Logistics was founded in **October 2020** by a group of forward-thinking individuals who shared a belief that logistics should become more than just a service and instead be an essential resource for companies. We continued despite of early obstacles, including unstable economies and intense rivalry.

By being committed and devoting great attention to our customers, we changed, improved, and adapted. We now represent persistence and customer-focused thinking, turning challenges into opportunities.

We are more than just a logistics company—we're a symbol of determination, delivering revolutionary strategic ideas that transform logistics relationships.
